

BEFORE

- Head forward and upper rib cage restricted
- Restricted movement & lower back pain
- Body tipped forward with reduced spinal curves

AFTER

- Head on top of shoulders
- Rib cage more open and breathing easier
- Movement and pain in lower back significantly improved
- Body more upright

"I came to see Rob due to pain and discomfort in my lower back. Before the treatments I couldn't bend down and my normal daily activities were restricted. My pain greatly gone now. I can bend down now and my normal daily practices are back to normal. Also, my body is more upright. People from PRC are lovely, and they make you feel at ease. I would definitely recommend you to others!"
